SUMMARY

Backend-leaning full-stack engineer with 3.5+ years designing Node.js services, REST APIs and data models in PostgreSQL and MongoDB. Solo-built OneFeeOKR's multi-tenant backend (39 RLS policies, billing enforced in SQL, hourly jobs, signed webhooks) and build Stackly's builder, AI and CRM services for a US-based company.

TECHNICAL SKILLS

Backend: Node.js, Express, REST API design, GraphQL (Apollo), webhooks, scheduled jobs, RBAC, multi-tenancy
Data: PostgreSQL, Supabase (RLS, Auth, Realtime), MongoDB, Drizzle ORM, SQL, Zod, schema design & query tuning
Integrations: Paddle, Resend, Slack/Teams, HubSpot, Jira, Linear, AI/LLM APIs · Netlify, Vercel, AWS, Docker, CI/CD
Tools & frontend: Git, Jest, Postman, Jira · React, Next.js (App Router, SSR), Redux, Zustand, Tailwind CSS

EXPERIENCE

Full Stack Developer · Adabra — Jun 2024 – Present
Remote · Dubai, UAE

- Build and own the Node.js/Express and MongoDB services behind 4 core Stackly modules (Pages, Funnels, CRM reporting, Clients/Projects), from schema and API contract design through code review and release.
- Built persistence for the GrapesJS editor (page and funnel documents, component trees, styles, sub-pages, custom-domain publishing), shared by Pages and 17 funnel templates.
- Delivered CRM reporting and a report builder with filters, metrics and saved reports; kept APIs fast with targeted MongoDB indexes and set up CI/CD and peer-review standards.

Software Engineer · Smart Engineering & Design Solutions — Jul 2023 – Jun 2024
Islamabad, Pakistan · On-site

- Designed the relational schema (10–15 modules, 10,000+ records) and built Node.js/Express REST APIs for real-time inventory, inter-store transfers and cross-location reporting.
- Maintained EmpowerCRM, a healthcare-staffing CRM, fixing reported issues and extending its Jobs, Sourcing and Tasks modules.

Software Engineer Intern · Pixako Technologies (Pvt.) Ltd — Feb 2023 – Jul 2023
Islamabad, Pakistan · On-site

- Integrated a GraphQL (Apollo) data layer for real-time analytics dashboards without over-fetching.
- Implemented Next.js server-side rendering, moving data fetching to the server for SEO and first-load speed.

PROJECTS

OneFeeOKR · OKR SaaS with one flat fee per company · solo build · 2026
Live site | Live preview (no signup) | Case study

- Designed a multi-tenant Postgres schema on Supabase (23 tables, 9 migrations) with 39 RLS policies, 5 workspace roles, a coach role across client workspaces and an audited platform-admin role.
- Enforced Paddle billing in SQL: webhook-driven plan state, guard functions that make lapsed workspaces read-only, and triggers for plan limits, with data always exportable.
- Built hourly Netlify jobs (reminders, Monday summaries via Resend, integration syncs), signed one-click check-in links, outbound webhooks and a bearer-key REST API; AES-256-GCM token encryption.

Stack: Node.js · TypeScript · Supabase · PostgreSQL · Drizzle · Zod · Paddle · Resend · Netlify · Next.js

Stackly (Agency Eleva) · Agency platform: sites, funnels, CRM · Adabra
Case study | dev.agencyeleva.com (access on request)

- Persisted editor documents in MongoDB for Pages and Funnels with custom-domain publishing, and integrated Magnus Intelligence (AI) page and section generation with file and image context.

Stack: Node.js · Express · MongoDB · React · GrapesJS · AI/LLM APIs

EDUCATION & MORE

BS in Computer Science · University of Southern Punjab, Multan · Oct 2018 – Oct 2022
Certification: MERN Stack Development (PSEB) · Languages: English (professional), Urdu (native), Punjabi
