SUMMARY

Full-stack engineer with 3.5+ years shipping production SaaS in React, Next.js, Node.js and TypeScript. I built Stackly's GrapesJS page and funnel builder, in-editor AI generation and CRM reporting UI as Senior Frontend Engineer at Adabra (Dubai, remote), and solo-built OneFeeOKR, a multi-tenant OKR SaaS with Postgres RLS, database-enforced billing and nine integrations.

TECHNICAL SKILLS

Frontend: React, Next.js (App Router, SSR/ISR), TypeScript, JavaScript, Redux Toolkit, Zustand, Tailwind CSS, GrapesJS
Backend: Node.js, Express, REST & GraphQL (Apollo) APIs, Socket.io, webhooks, scheduled jobs, AI/LLM API integration
Data: PostgreSQL, Supabase (Auth, RLS, Realtime), MongoDB, Drizzle ORM, Zod, SQL, schema design & indexing
Cloud & tools: Vercel, Netlify, AWS, Docker, CI/CD, Git, Jest, React Testing Library, Postman, Jira, Paddle, Resend

EXPERIENCE

Senior Frontend Engineer · Adabra
Jun 2024 – Oct 2026

Remote · Dubai, UAE

- Owned the frontend of 4 core Stackly modules (Pages, Funnels, CRM reporting, Clients/Projects) in React and Vite, from component design and state through code review and release.
- Engineered the GrapesJS page editor (drag-and-drop blocks, device previews, layers, motion, inline rich-text editing, sub-pages, custom-domain publishing) and 17 funnel templates on the same core.
- Integrated Magnus Intelligence (AI) into the editor UI and built CRM dashboards with a report builder (filters, metrics, 5 chart types) and the client workspace; promoted from Associate to Senior Frontend Engineer.

Software Engineer · Smart Engineering & Design Solutions
Jul 2023 – Jun 2024

Islamabad, Pakistan · On-site

- Built a multi-store retail management platform end to end (React/Redux UI, Node.js/Express, relational schema) across 10–15 modules for 10,000+ records, with REST APIs for real-time inventory and cross-location reporting.
- Maintained EmpowerCRM, a healthcare-staffing CRM: fixed reported issues and shipped feature requests across its Dashboard, Jobs, Sourcing and Tasks modules.

Software Engineer Intern · Pixako Technologies (Pvt.) Ltd
Feb 2023 – Jul 2023

Islamabad, Pakistan · On-site

- Built a reusable React component library that standardized UI patterns across the team's projects.
- Added Next.js SSR to public pages for SEO and faster loads; integrated GraphQL (Apollo) for dashboards.

PROJECTS

OneFeeOKR · OKR SaaS with one flat fee per company · solo build · 2026

Live site | Live preview (no signup) | Case study

- Designed, built and launched solo on Next.js 16, TypeScript and Supabase: 23 Postgres tables isolated by 39 row-level-security policies, 5 workspace roles and a coach mode spanning client workspaces.
- Enforced Paddle billing in SQL (webhook-driven plan state, read-only lockout for lapsed workspaces, plan limits as triggers); hourly jobs send reminders and Monday summaries via Resend.
- Shipped 9 integrations (Slack, Teams, Sheets, HubSpot, Pipedrive, Jira, Linear, Zapier, Make), signed webhooks and a bearer-key REST API; real-time UI via Zustand and Supabase Realtime.

Stack: Next.js · React · TypeScript · Supabase · PostgreSQL · Drizzle · Zustand · Zod · Tailwind CSS · Paddle · Resend · Netlify

Stackly (Agency Eleva) · Agency platform: sites, funnels, CRM · Adabra

Case study | dev.agencyeleva.com (access on request)

- Integrated Magnus Intelligence (AI) into the editor: full landing pages in standard and 3D layouts, or single sections, from a prompt with file and image context, plus a template gallery with live device previews.

Stack: React · Vite · GrapesJS · AI/LLM APIs

EDUCATION & MORE

BS in Computer Science · University of Southern Punjab, Multan · Oct 2018 – Oct 2022

Certification: MERN Stack Development (PSEB) · Languages: English (professional), Urdu (native), Punjabi
